

## Rover takes the mystery out of international shipping.

International shipping doesn't need to be a mystery.

With Rover, you get instant Canadian and foreign rates. Our international mail partners take care of all the customs transactions, so you don't have to. All of this translates into big savings for you.

Every country has a different rate. What a headache! Rover will give you one price for all of your international mail. Total pieces, total weight, one cost. And no "rounding up" on the weight - this keeps your costs down.

By reducing the number of "touches" in the mailing process, we give you more reliable deliveries. We use the name-brand carriers you know and trust. This gives you full trackability throughout the whole process.

We'll supply you with a simple 3-part international manifest. You fill it out and send one copy to us (either fax it or upload it to our easy file upload portal on our

home page). Then, keep one copy for yourself, and put a copy in with your mail.

Mission accomplished, mystery solved!
